

# Gyro compass (GC)

Recorded findings are mostly related to desynchronised compass readings between main unit and repeaters.

- ☐ Type approved by flag administration.
- ☐ In good working condition as per requirements and manufacturer's manual.
- ☐ The alarms for internal faults function.
- ☐ Repeaters are in order and synchronised with main unit.
- ☐ Correction log book is available. Records are in order.
- ☐ Compared readings with magnetic compass.
- ☐ Procedures are in place for the periodical testing/maintenance of GC. Records are available and verified by Master.
